Royal Children's Hospital

TBS (Aust) Pty Ltd

TBS (Aust) Pty Ltd is an Australian owned and operated company which imports and wholesales curtain and blind hardware with a focus on working alongside some of Australia's largest architects, developers, commercial and domestic retailers with a view to being able to offer a full suite of products for any type of development.

TBS continues to look for a competitive advantage realising that many architects and end users want to make a statement with their window furnishings. TBS offers the ability to provide custom made solutions through its Saber motorised curtains and blinds, venetian blinds, light filtering and block-out roller blinds, pole sets and a comprehensive range of tracking systems including applications for residential homes, hospitals, aged care, psychiatric wards and hotel developments.

With this philosophy TBS has expanded to have distributorship or representation in South Australia, Western Australia, New South Wales and Queensland with the market being serviced from our customer service centre in Melbourne and warehouses in Melbourne and Sydney.

The trend today is to source product off shore, in fact we have gone one step further by establishing our own manufacturing entity in Shanghai, China. The factory is run with western style management and controls to ensure that product designed for Australia meets our rigorous standards. With a combined total of 180+ years experience TBS are more than capable of servicing your requirements.

Product Outline

Screen Tracks

The System 90 TBS Meditrack Bedscreen and Mini Track systems are ideal for use in, but not limited to, intensive care units, emergency departments, nursing homes, aged care, general practices and dental surgeries to help facilitate patient privacy.

Extruded from commercial grade aluminium **TBS Bedscreen Track** is strong and versatile and can reach spans of up to 3 meters long without supports. If distances are greater than three meters, or supports are required, the track can be suspended using dropper rods, top fixed or fixed using wall brackets (please refer to the installation page for more details).
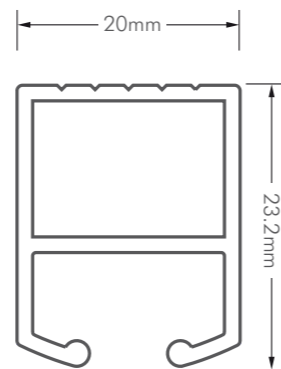

Track HT6000

Product Outline

Cassette System

The curtain cassette system allows for easy removal of the curtains without lifting and replacing the curtain hook by hook. With this system you are able to draw the curtain into the cassette and with a release of the knob the entire curtain will fall away for easy maintenance. For your convenience the cassettes are available in left, right and top release functions.
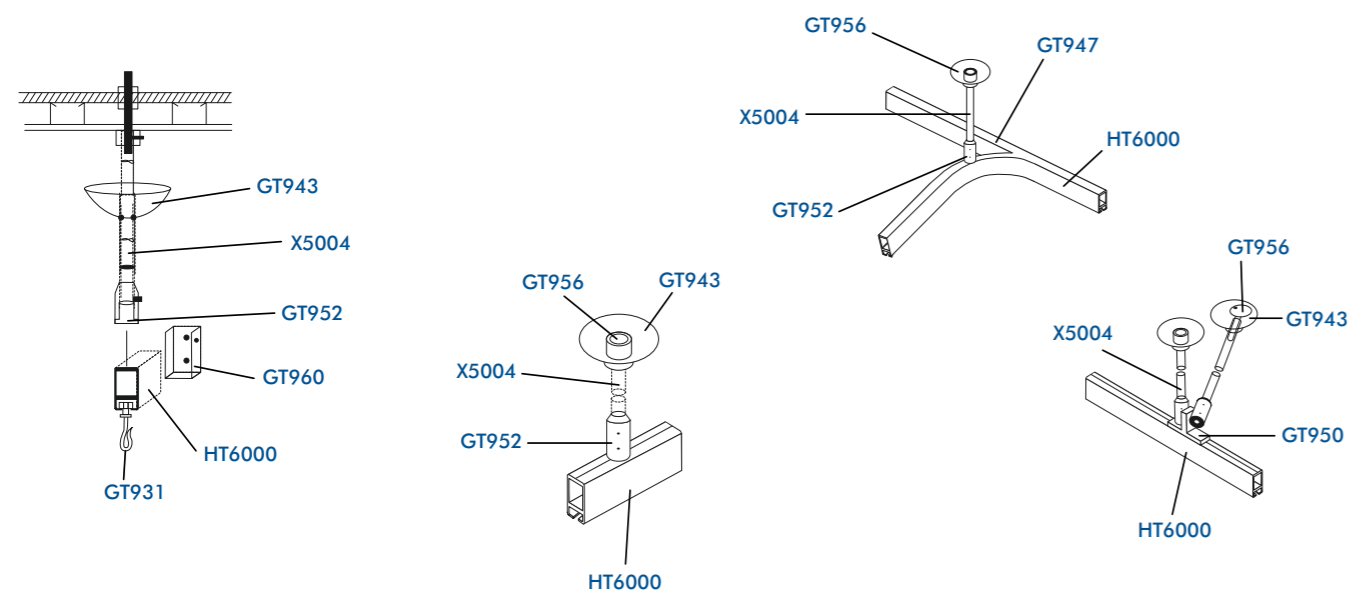

SIDE FIX
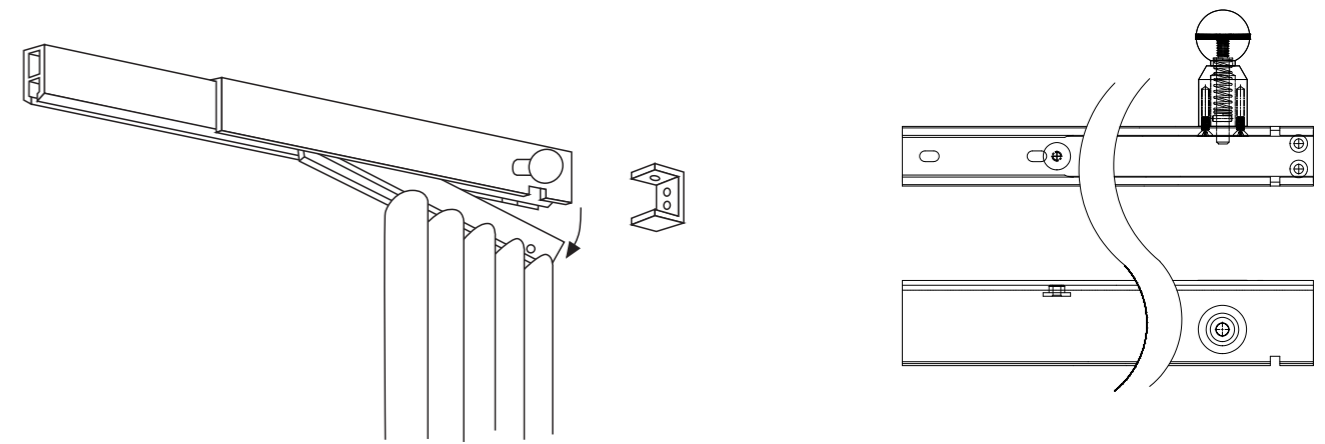

TOP FIX
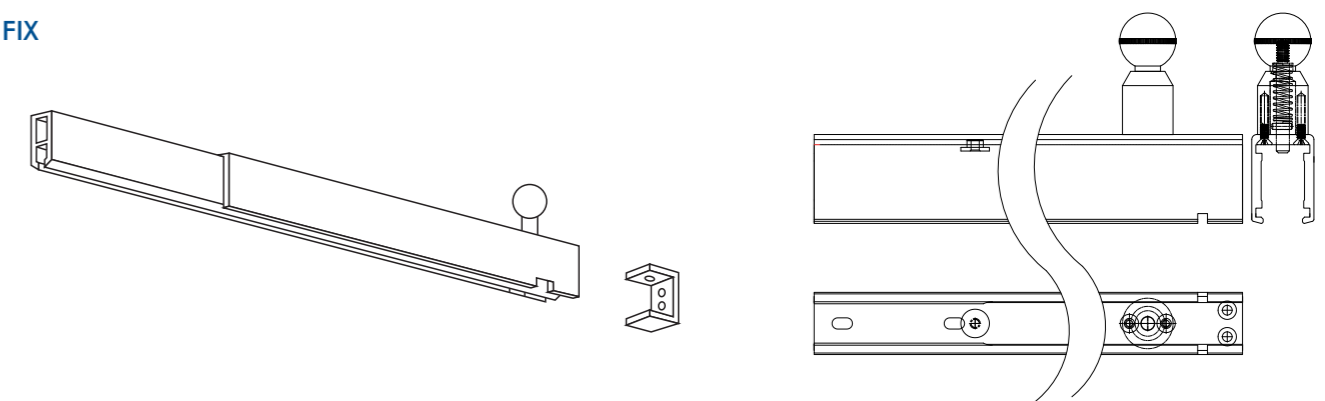

How to load the Cassette System

1 With the curtain attached slide the rotatable runners (GT931) into the cassette 'inner'

2 To lock the cassette 'inner' into the outer casing of the cassette (which has already been fitted) slot the 'inner' against the stopper at an angle and bring the other side up. Release the knob and bring the 'inner' into the outer casing, making sure the knob retracts back into the cassette system.

3 You can now draw the curtain out of the cassette and along the bedscreen track. To remove the curtain, reverse the process.

Installation

Ceiling Support Assembly

1 Place the TBS Bedscreen or TBS Mini Track on the floor directly below the area where the track is to be fitted.

2 Determine where the ceiling support (X5004, GT951, GT952) is to be mounted on the ceiling and the track, taking into account ceiling fans, air conditioning ducts, lights and other obstructions.

3 Mount the Double Point Hanger (GT952) into the desired location of the TBS Bedscreen or TBS Mini Track, keeping in mind the dropper rod (X-5004) must be mounted directly above into a solid fixing point.

4 Fix the wall mount bracket (A0-GT960/GT960M) to the walls at the specified minimum height from the floor, using 2100mm as the minimum height from the floor to the bottom of the wall mount bracket (A0-GT960/GT960M).

5 Slide one swivel curtain hook (GT931) every to every 10cm of track into the TBS Bedscreen or TBS Mini Track.

6 Lift the TBS Bedscreen or TBS Mini Track up, making sure it is supported at the necessary height and is square to the ceiling and floor. Extra personnel or supports may be required at this time.

7 To find the fixing point in the ceiling of the Single Point Hanger (GT951) drop a plumb line from directly above the Double Point Hanger (GT952) and mark the spot on the ceiling and fix the Single Point Hanger (GT951).

8 Measure the Dropper Rod (X-5004) and cut to the measurement. Place the rod inside the Single Point Hanger (GT951) and Double Point Hanger (GT952)
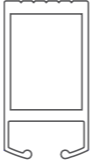

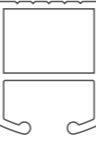

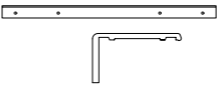

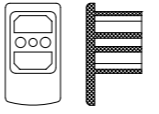

Quotations

The following information is required for quotation or supply purposes:

- Type of fixing (suspended or top fix)
- Fixing substrate (anchored to concrete soffit, plasterboard ceiling, ceiling grid, suspended ceiling grid etc.)
- Plans of installation, reflected ceiling plans, track layouts and scale plans or site measurements – or copies of quantity schedules. Allowances must be made for mechanical services, sprinklers, light fittings and ventilation.
- Fixing span
- Height above floor/dropper length
- Track finish e.g. white powder coat, satin silver anodised
- Track measurements
- Bend details e.g. location and extent of bend in degrees and radius where applicable
- Number of Meditrack curtain changing cassettes and type, if required
